

In the Abstract of the Disclosure

Please amend the Abstract as set forth below.

~~The inventive~~ A heald frame ~~comprises~~ including two posts ~~pillars (4), two cross bars (6) members and fixing means~~ connectors which are used for fixing securing at least one pillar post to at least one corresponding cross [[bar]] member. ~~and which comprise a protrusion (41) of the pillar (4) to be received in a recess arranged in the cross bar (6). Said fixing means also comprises~~ Each connector includes an intermediate tubular fixing element [[(14)]] which is disposed in a housing [[(12)]] ~~embodied provided~~ in the cross member and indented with respect to a front face of the cross member bar (6) and which element defines [[the]] an internal volume (V) which forms said reception housing for at least one part of said protrusion (41). The inventive healed frame is also provided with common connection means between said intermediate element (14) and the cross bar (6) in which a protrusion extending from the at least one post is seated.

A clean copy of the amended abstract is attached to this response. It would be appreciated if the Examiner would indicate the acceptance of this amended abstract in the next office communication.

Abstract of the Disclosure

A heald frame including two posts, two cross members and connectors which are used for securing at least one post to at least one corresponding cross member. Each connector includes an intermediate tubular fixing element which is disposed in a housing provided in the cross member and indented with respect to a front face of the cross member and which element defines an internal volume in which a protrusion extending from the at least one post is seated.
